Areas of UI Expertise

- Responsive web development using HTML5, CSS3, Bootstrap, and JavaScript.
- Creating dynamic and data-driven pages using JavaServer Pages (JSP).
- Developing modular and reusable UI components for efficient and maintainable code.
- Ensuring cross-browser and cross-platform compatibility.
- Integrating RESTful APIs for seamless front-end and back-end communication.
- Experience with Flexbox and CSS Grid for responsive layouts.
- Strong knowledge of form validation, event handling, and DOM manipulation in JavaScript.
- Version control using Git for code collaboration and management.

Professional Experience

- UI Developer at Rasapoorna Foods Pvt. Ltd, Visakhapatnam.
- January 2024 – July 2025

Education

- B.Tech in Computer Science, Raghu Engineering College, Andhra Pradesh — 2023

Projects # 2

Project : **Task Management**
Project type : Web Application
Platform : JSP, HTML, CSS, JavaScript
Duration : Jan 2025 to July 2025

Responsibilities

- Designed responsive UI for task creation, assignment, and tracking.
- Built reusable components using HTML, CSS, JavaScript, and Bootstrap.
- Integrated front-end with RESTful APIs for real-time updates.
- Handled form validation and dynamic data rendering.
- Collaborated with backend team for smooth data flow.
- Optimized UI performance and fixed cross-browser issues.
- Participated in Agile sprints and implemented feedback.

Tasks Completed

- Created a dynamic task dashboard for assigning, tracking, and updating tasks.
- Used client-side validation and real-time interaction for a better user experience.
- Improved interface usability based on feedback from internal teams.

Project # 1

Project : **Tele Directory**
Project type : Web Application
Platform : JSP, HTML, CSS, JavaScript
Duration : June 2024 to Jan 2025

Responsibilities

- Designed and developed an interactive telephone directory using HTML, CSS, JavaScript, and JSP.
- Implemented search and filter features for easy lookup of contact information.
- Integrated dynamic JSP pages to fetch and display data from backend systems.
- Ensured a responsive UI for accessibility across desktops, tablets, and mobile devices.
- Worked closely with backend developers to maintain data integrity and display logic.
- Optimized performance and ensured cross-browser compatibility for a seamless user experience.
- Managed UI enhancements based on user feedback to improve usability.

Tasks Completed

- Developed a complete online directory system for employees using JSP and JavaScript.
- Implemented search and filter functions for quick navigation and lookup.
- Ensured seamless integration with the backend database.

Soft Skills

- Team Collaboration
- Time Management
- Communication
- Problem Solving
- Adaptability
